Dear Examiners:

Thank you for the thorough examination of my application, particularly the details of construct and format to comply with your regulations/laws. Enclosed you will find a far more satisfactory presentation of my concept. I complied with the editing notations to present a comprehensible disclosure.

My daughters and I are anxious to begin marketing these innovative painting/coating brushes to reduce strain and fatigue for users, but we hesitate to expend effort and funds before we are certain that my patent issues. If there be any further information to meet editing protocol needed to explain our unique and practical utility, then certainly I will respond immediately. Your expedient attention has been geatly appreciated. Thank you.
